In order to understand the urban environment, we need to pay attention to the senses. The senses are the means through which we perceive the world around us. By paying attention to the senses, we can better understand how urban environments shape daily practices and contribute to new forms of understanding. The senses are not only important for understanding urban environments, but they are also central to our experiences of urban life.

Biophilic Cities

Biophilic Cities by Ricardo Paredes (2014)

Biophilic Cities by Ricardo Paredes (2014) has been a valuable resource for urban planners and architects. It offers a stimulating new relationship between urban space and urban life. The book explores the connection between nature and urban design, highlighting the importance of incorporating natural elements into urban environments.

Various media are employed—poetry, recipes, photos, comics, and other textual experiments—to engage readers and their senses. Written for a broad audience, this text is an excellent addition to the study of the environment, urban design, and sensory design. What scents shape the city? How does scent contribute to placemaking? How do we design smell environments in the city? Urban Smellscapes makes a notable contribution towards the growing body of literature analyzing the role of smell in urban environments.
